Experience

Web Developer Associated Students Graphic Studio

December 2019 → September 2020

Lead web development initiatives for UCSD's student government—the latest being the Sun God Festival website, which attracts an audience of upwards of 12,000. Other responsibilities include creating content management systems and meeting client requests.

Web Developer Design Co

October 2019 → June 2020

Collaborated with designers to implement prototypes into high-fidelity states for UCSD's largest pre-professional design organization. Other functions include being a student leader by helping grow the design community and facilitating large-scale events.

UX Developer UCSD Information Technology Services

June 2019 → October 2019

Improved the web design of UCSD's largest subdomain (blink.ucsd.edu) of >4,000 pages using user-collected data. Updated and migrated website content using a CMS and analyzed web content architecture to make organizational improvements.

UX Developer Center for Applied Internet Data Analysis

June 2018 → September 2018

Developed visual components using Meteor.js for a crowdsourcing-based platform for Internet measurement tasks, helping produce hundreds of datasets from 43 users who signed up in the 1st round of experimenting. Led evaluation and repairment of visual bugs.

Skills

HTML5	Git	Figma	Rapid Prototyping	SEO
CSS3 – SASS	npm	Netlify	User Research	Responsive Web Design
JavaScript – React	Ajax	Photoshop	Storyboarding	Cross-Browser testing
