Experience

Frontend Developer Intern AMPLY Power

February 2021 → Current

Owned the entire development lifecycle from wireframing to implementation of an EV fleet charging tool. Consumed RESTful APIs to retrieve customer order information and store front-end user data. Regularly met tight project deadlines for external demonstration purposes.

Web Developer Associated Students Graphic Studio

December 2019 → September 2020

Lead and launched 6 web development initiatives for UCSD's student government – the most notable being the Sun God Festival website, attracting an audience upwards of 12,000. Other responsibilities include improving content workflows, meeting stakeholder requests, and digital advertising.

Web Developer Design Co

October 2019 → June 2020

Collaborated with multidisciplinary designers to implement hi-fidelity prototypes into MVP deliverables and beyond for UCSD's largest pre-professional design organization. Other responsibilities include being a student leader to help grow the design community and facilitate large-scale events.

UX Developer UCSD Information Technology Services

June 2019 → October 2019

Improved the design of UCSD's largest subdomain (blink.ucsd.edu) of >4,000 web pages using user-collected data. Updated and migrated website content using a proprietary CMS and analyzed content architecture to conduct organizational improvements.

Skills
